Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, 14-23, and 31, drawn to a torch, classified in class 431, subclass 345.
 - II. Claims 24-29, drawn to a torch butt, classified in class 431, subclass 345.
 - III. Claims 9-13, drawn to a method of manufacturing a torch classified in class 431, subclass 345.
 - IV. Claim 30, drawn to a method of moving a lever, classified in class 431, subclass 2.
 - V. Claims 32-35, drawn to a handle, classified in class 81, subclass 489.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not recite the gas passageway structure of the torch butt. The subcombination has separate utility such as the body of a hand held cigarette lighter.

Inventions III and I and II are related as process of making (III) and products made (I and II). The inventions are distinct if either or both of the following can be shown: (1) that the

Art Unit: 3749

process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

In the instant case the process could be used to make a fire extinguisher.

Inventions IV is unrelated to any of Inventions I, II, III, or V. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case invention IV has a different modes of operation then any of Inventions I, II, III, or V.

Invention V is unrelated to any of Inventions III or IV. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case invention III has a different modes of operation then any of Inventions III or IV.

Inventions I, II and V are related as combination (I and II) and subcombination (V). Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combinations as claimed do not require the particulars of the subcombination as claimed because the combinations do not recite the handle structure. The subcombination has separate utility such as the handle of a hammer.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different prior art searches, and divergent subject matter and restriction for examination purposes as indicated is proper.

Conclusion

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. A ONE month shortened statutory period for reply has been set. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) months from the mailing date of this communication.
